

To Whom It May Concern:

Maroondah City Council engages Elmsavers as the preferred contractor for its Elm Leaf Beetle control program.

Elmsavers has demonstrated a high degree of professional proficiency with all standard methods of application.

Council has decided that the micro injection technology developed by ElmSavers is the preferred method due to its superior efficacy and very low environmental risk. Public safety & legal concerns are also minimised.

The company is involved with Council on other issues regarding disease control in our amenity trees, successful treatments are now in place.

We have no hesitation in recommending ElmSavers to interested parties concerned.

A handwritten signature in black ink, appearing to read 'P Goegan'.
